Issue 79 - April 2005

Hawk Clean and Coat is a division of  **MONITOR**

Boxer 24 double diaphragm pump

We now stock a brand new pneumatic double diaphragm pump. It is suitable for transferring and feeding solvents, paints, inks, oils and abrasive liquids. The direct suction from container assures a constant feed of the product. All parts in contact with the product are built with a special anti-acid and fireproof material. No lubrication and maintenance needed and the pump is non-stalling. It is capable of delivering 24l/min at 8 bar. Coupled to a conventional spray gun it is useful for replacing the usual pressure pot in coating applications.

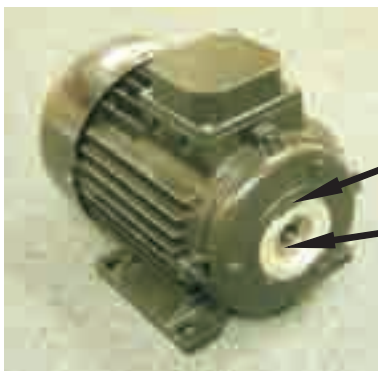

Hawk Hydraulically-Powered Pump

The hydraulically-powered pump, although small, is extremely powerful and versatile. Coupled to a hydraulic power pack or to the existing hydraulic pump on a wide range of vehicles (e.g. tractors and construction trucks), various models deliver volume/pressure ratios from 32.5 l/min at 150 bar to 1,5 l/min at 1400 bar. The hydraulic end comes with an oil flow/pressure regulator and the water end has a built-in unloader. We have been conducting trials which have been very successful. The range also offers oil intensifiers for operating a very wide range of hydraulic tools - crimpers, cutters, expanders, jaws-of-life, jacks etc.

Superior motors

Previously our pumps were fitted with hollow shaft motors that only had one bearing at the back (fan end), relying on the pump bearings to support the front end of the rotor. They occasionally failed in applications where the units were transported on trucks and were subject to extremely rough treatment. Our supplier solved the problem by fitting an oversized bearing to the front end. They also made the flange thicker and stronger to better carry the weight of the pump. This will improve Hawk high pressure cleaners.

Large bearing supports the front end of the hollow-shaft rotor

Thick, strong pump mounting flange

“Develop the attitude that there are more reasons to succeed than to fail”

Do you have special requirements?

Hawk has been custom designing products for a long time now. We, as a manufacturer would like to know from you, as a customer, if there are any high pressure cleaning products that we can custom design to suit your cleaning requirements. If you need more information, please do not hesitate to contact any of our offices and we will gladly assist you, or visit our website on www.cleanandcoat.co.za

Would you like a free Hawk pen?

Is there anyone that you know who would like to receive our ***free monthly colour newsletter*** posted to them free of charge. Please fill in the details below and send it back to us. For your kind assistance you will receive a ***free Hawk pen***.

All you have to do is fill in the name of that person and contact details and fax it back to us on 031 205 4332 or e-mail it to pam@cleanandcoat.co.za. Please don't forget to give us your details in order to receive your free pen.
