

HAWK

clean and coat news

Issue 112 June 2011

Did you know?

If the power supply to the motor is too low, the starter overload protector will trip. However, it is not advisable to rely entirely on the overload protector.

Make sure that the mains power is more than sufficient for the motor size.

Check the temperature of the motor regularly during operation. If it feels too hot, get the advice of a qualified electrician.

Too long an extension lead, or too light a cable, results in a voltage drop and this can lead to a burned out motor.

Never share a plug with other machines.

Funnies

Even dogs do it...

Tell her you are a guard dog. Yeah! A rottweiler, and that you're single and neutered....

Inspirational

Change is the law of life. And those who look only to the past or present are certain to miss the future.

Electric Powered Piston Airless Paint Sprayers

Hawk now has a range of electric piston airless paint sprayers. The PM021LF has a small, easy to carry, frame which can be used with up to 0.021" nozzle. The same pump on a trolley is the Pm021.

The PM025 and PM035 can handle 0.025" and 0.035" nozzles respectively and are mounted on trolleys.

Each pump is supplied with a 10m hose, gun and reversible spray tip. An LCD display allows for easy and accurate pressure regulation.

Chain Flail with std chain & front cutter

Retro Bomb Nozzle with front orifice

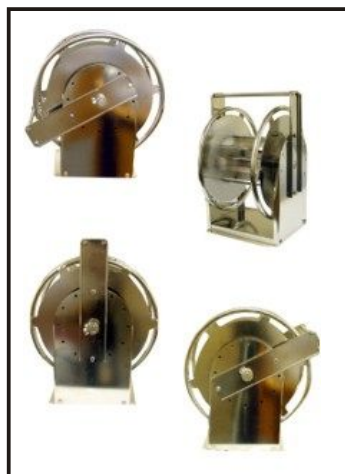

Flounder Nozzle for sand removal

Tube and Drain Cleaning Nozzles

Hawk have a range of pipe and drain cleaning nozzles. They are high-performance nozzles and cover a wide range of applications.

The range consists of standard retro nozzles and "bombs" for sewer cleaning, sand removal "sleighs" for storm water drains as well as milling cutters and chain cutters for sewers blocked with debris and roots.

For heat exchangers and evaporator-work there are spinners and chisels in a variety of designs. Prices are very competitive.

Hawk Live Hose Reel **LATEST PRICES!**

Hawk recently introduced their innovative, new design for the Live Hose Reel, featuring a multi-positional guide. We are now pleased to announce the latest, competitive pricing on this great product.

8HR-4	Live Hose Reel (425 x 300mm)	Max 30m	R 5,385⁰⁰
8HR-5	Live Hose Reel (500 x 300mm)	Max 50m	R 6,305⁰⁰

The hose reels are constructed from polished 304SS and includes a swivel. High pressure hose is not included. The inlet can be placed at either end.

The hose guide can be positioned upright (for when the reel is suspended from an overhead beam), and four positions either side, giving a total of nine guide positions.

Patrick Mike Jan

Meet our JHB sales team

Patrick and Jan (Welcome back Jan!) are the beginnings of our new internal sales team.

Mike manages the branch and visits our distributors as well as customers.
