Issue 75 - Nov/ Dec 2004

Hawk Clean and Coat is a division of  **MONITOR**
DISTRIBUTORS

A new range of airless air-operated paint spraying pumps has been developed and the first of the range will be marketed in South Africa as the Hawk 12000P. This unit converts air pressure into airless paint pumping at a ratio of 40:1. In other words, the paint will be sprayed at 40 bar. The sprayed paint can then be applied as pure airless, or with a special gun as a blend of paint and air. This means that the unit has the speed advantage of airless with good finish quality. The paint only comes into contact with stainless steel. The air motor is such that the unit will not pulse, will not stall and will not ice up as other brands do. The displacement is 11 l/min and the maximum nozzle is 0.041 (41 thou) Priced correctly, this should be a winner.

In the near future the existing P500 gun will be replaced by the P500N. The new gun is lighter and has a much softer trigger action, making it easier on the operator. From a technical point of view, the pressure safety factor is now 4x as opposed to 3x on the old gun, and because it is rated at 500 bar, the gun can safely withstand 2,000bar. Also very important is the fact that the tungsten carbide in the needle ball and seat, now contains 9% nickel. It will now be suitable for use with acidic paints

PETROL - Up to
200 bar
Medium Chassis

The Hawk range of petrol-powered high pressure cleaners are now much lower in price. With the cost of petrol engines have come down, and with the stronger rand we can now sell them at much lower prices.

5H-P/12-140	12 l/min x 140 bar	R7500.00
5H-P/15-150	15 l/min x 150 bar	R10500.00
5H-P/15-200	15 l/min x 200 bar	R10950
5H-P/18-200	18 l/min x 200 bar	R12900.00

Versatile, durable and affordable cleaning solutions

They're on the way

Arriving at the end of November is the new range of vacuum cleaners. They come in three different sizes with stainless steel tanks. All are wet and dry cleaners and have the usual range of accessories. In time we will extend the range.

Technical Data

Model: ARES-WI110

Stage: Two
Tank capacity: 18 lt
Wet & Dry: Yes
Air flow: 170m³/h
Cooling: Bypass

Price: R1945.00+vat

Technical Data

Model: ARES/PLUS-WI110
Motor: 1 x 1250W
Stage: Two
Tank capacity: 32 lt
Wet & Dry: Yes
Air flow: 170m³/h
Cooling: Bypass

Price: R2450.00+vat

Technical Data

Model: EXEL-WI220
Motor: 2 x 1200W
Stage: Two each
Tank capacity: 76 lt
Wet & Dry: Yes
Air flow: 340m³/h
Cooling: Bypass

Price: R4155.00+vat

Technical Data

Model: VERSO-WI220
Motor: 2 x 1200W
Stage: Two each
Tank capacity: 76 lt
Wet & dry: Yes
Air flow: 340m³/h
Cooling: Bypass

Price: R4880.00+vat
